

EXCITING JOB OPPORTUNITIES.

AA Kenya is a distinguished motoring organization affiliated with the Federation Internationale de l'Automobile (FIA). With a rich history spanning over 106 years, the organization has been instrumental in shaping the automobile industry in Kenya. We are committed to delivering world-class mobility solutions to its members and the public. Our services include comprehensive driver training programs, issuance of International Driving Permits, Car Passports, vehicle inspection and valuation, technical training courses, and road rescue services. Additionally, the organization provides Driver Assessments and offers a variety of other mobility-related solutions to meet the diverse needs of motorists. AA Kenya is also actively engaged in the Tour and Travels sector, further broadening its portfolio of services in the transportation industry.

AA Kenya wishes to recruit highly talented, motivated and forward-thinking individuals to fill the following positions;

6. Partnerships and Stakeholder Engagements.

Minimum job requirements:

For appointment to this position, one must possess:

- Bachelor's degree in PR, Marketing or any related field.
- Qualified chartered marketer will be an added advantage.
- At least 7 years' experience preferably in a reputable firm, with at least 2 years in a leadership role.
- A track record of developing and leading teams to successful delivery of tangible value in a dynamic business environment.
- High level of commercial awareness and capacity to leverage on expertise in order to generate sales.

Skills and Competencies

- Strategic thinking and execution
- Market research and reporting skills.
- Ability to analyze and appropriately respond to market research, current market conditions and competitor information.
- Excellent project and events management skills.
- Excellent creative writing skills.
- Excellent organizational skills and attention to detail.
- Ability to interact at all levels within the business.
- Excellent verbal and written communication skills.
- Excellent people skills to build, enhance and sustain team performance.

2. Go Backend Engineer**Job Summary**

We are looking for a talented Go (Golang) Developer to design, build, and maintain high-performance, scalable microservices that power our customer-facing and internal systems. The job holder will be working in a modern, cloud-native environment on a microservices architecture built primarily in Go, running on Kubernetes (AWS/EKS or GCP).

Key Responsibilities.

1. Design, develop, and maintain scalable and resilient microservices in Go
2. Write clean, well-tested, and maintainable code (we love idiomatic Go!)
3. Collaborate with product managers, frontend engineers, DevOps, and other backend teams
4. Participate in architecture discussions and code reviews
5. Optimize performance, latency, and cost of services
6. Integrate with third-party APIs (payments, SMS, mapping, insurance providers, etc.)
7. Help evolve our CI/CD pipelines and observability (Prometheus, Grafana, Open Telemetry)

Tech Stack You'll Work With

Backend: Go (1.22+), gRPC, REST, Gin

Data: PostgreSQL, Redis

Infrastructure: Docker, GitHub Actions, ArgoCD

Message brokers: RabbitMQ

Monitoring & Logging: Prometheus, Grafana, Loki, Jaeger

Minimum job requirements:

For appointment to this position, one must possess:

- 3 plus years of backend development experience.
- 2 plus years of professional experience with Go in production systems (please share your GitHub or public projects if possible)
- Strong understanding of microservices architecture, REST/gRPC APIs, and distributed systems
- Experience with relational databases (PostgreSQL preferred) and caching (Redis)
- Comfortable with Git, Docker, and CI/CD workflows
- Good knowledge of software engineering best practices (testing, code reviews, documentation)
- Excellent problem-solving skills and attention to detail.

Nice to have;

- Experience with event-driven architecture (Kafka, NATS, RabbitMQ).
- Contributions to open source Go projects or a strong personal GitHub profile.
- Familiarity with AWS or GCP services.
- Previous work in fintech, insurance, logistics, or mobility sectors.
- Experience with domain-driven design or CQRS.
